### **DETAILED ACTION**

1. It would be of great assistance to the Office if all incoming papers pertaining to a filed application carried the following items:

1. Application number (checked for accuracy, including series code and serial no.).
2. Group art unit number (copied from most recent Office communication).
3. Filing date.
4. Name of the examiner who prepared the most recent Office action.
5. Title of invention.
6. Confirmation number (See MPEP § 503).

### ***Information Disclosure Statement***

2. The examiner has considered the IDS filed 9/17/03.

### ***Drawings***

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: "**partial clock switching circuit 100**". Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

Art Unit: 2611

4. Claims 2 and 11 are objected to because of the following informalities: the digital filter produces an equalized out put having a frequency response of “**aSinc(f/2)+bSinc(2f)**” not “**aSinc(f)+bSinc(2f)**”. Appropriate correction is required. (see paragraph{0031}).

***Allowable Subject Matter***

5. This application is in condition for allowance except for the following formal matters:

See above objection.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

6. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fail to anticipate or render obvious the claimed “ method for reducing intersymbol interference in a stream of data bits to be transmitted over a transmission medium, comprising: (a) delaying a reference clock to produce a phase delayed clock that produces an edge on sub-bit boundaries; and (b) **inputting the phase delayed clock and the data bits into a digital filter in order to perform-equalization on the data bits, wherein the phase delayed clock causes the digital filter to perform partial clock switching, such that equalization is performed on the data bits on sub-bit boundaries.**” As claimed in claims 1 and 10.

***Conclusion***
